

What you'll find here:

A gameboard, complete in itself.

The Flazeebo game comes with one example game, complete and ready to play. Just print out the dice and roll, and your students, your children, or your pals can get started.

The set also comes with blanks, because the beauty of Flazeebo is that it's designed to spark creativity.

Flazeebo isn't just a game. It's an idea-starter, like everything else at Inkless Tales. It's meant to be inspirational, so that children are empowered to make their own.

Encourage your children not only to color in the blanks, but to fill in the blanks with whatever adventures they'd like to plot for themselves.

Encourage them to invent their own Flazeebo games, on their own paper, developing their own game paths.

Creativity is not only fun, but it's an important step for children in their brain development, leading to crucial critical thinking skills that will guide them and serve them throughout their lives.
